MACP WORKSHOP

To support MACP students at every stage of professional formation,
Reimagining Resumes & Cover Letters for the New Counselling Landscape Workshop
is now offered as a monthly session.

This session provides structured guidance for translating academic training, practicum experience, and emerging counselling identity into professional materials that reflect purpose, competence, and impact. Rather than focusing solely on job search mechanics, the workshop emphasizes the transition from student to practitioner — helping participants articulate their professional "why," demonstrate counselling competencies through accomplishment-based language, and position themselves within an evolving and interdisciplinary mental health landscape.

Students are encouraged to attend at the point in their program when they are preparing for practicum placement, employment applications, or simply seeking greater clarity about their professional direction.
